## Overview

---

How many solar panel manufacturers are there in Europe?

Europe is home to a large number of world-class solar panel manufacturers. In the following section, we provide an overview of 59 leading manufacturers, all of which are contributing significantly to Europe's renewable energy landscape.

How many solar plants are there in Europe?

The latest report on the supply chain for European PV module production provides the status of 121 solar manufacturing sites, including closures and capacity on hold. It maps plants that produce PV modules, cells, wafers, ingots, polysilicon, and metallurgical-grade silicon.

Who are Europe's leading solar manufacturers?

In the following section, we provide an overview of 59 leading manufacturers, all of which are contributing significantly to Europe's renewable energy landscape. From established companies such as Primroot.com and HUAWEI to innovative newcomers, these manufacturers represent the cutting edge of solar technology.

Who makes the most solar panels in Europe?

In particular, it is the largest European brand of solar panels. By the end of 2015, REC had been able to produce around 20 million solar panels and about 5 GW of clean energy. That number is enough to power almost 8 million people at home.

Are solar panels made in Europe certified?

All solar panels made in Europe are required to carry this certification. This certification, developed by the International Electrotechnical Commission (IEC), specifies test procedures to assess the performance of crystalline silicon terrestrial photovoltaic (PV) modules under natural sunlight.

What is the European solar industry?

The European solar industry is a diverse and thriving sector, boasting numerous manufacturing and supply centers. With vast resources dedicated to advancing the renewable energy sector, these hubs serve as pivotal points for the production and distribution of solar panels across the continent.
