

Taipei emergency energy storage power supply manufacturer

Overview

Why did Taipower implement an energy storage system at Xiaxing power plant?

To stabilize the frequency of the power grid for Kinmen and reduce the impact of fluctuations on the power generation of renewable energy, Taipower decided to implement an energy storage system at the Xiaxing Power Plant in Kinmen. This created instant backup power.

Is Taiwan's Power system stable?

As Taiwan promotes its energy transition, the proportion of renewable energy is gradually increasing, while traditional power facilities are being decommissioned. However, the public has grown increasingly concerned over the stability of Taiwan's power system.

When are emergency units activated in Taiwan?

According to regulations set by Taiwan Power Co (Taipower) and government agencies, emergency units are only activated when the projected power supply margin falls below 6 percent, or when sudden power shortages occur due to accidents, natural disasters or national security issues.

Are Taiwan's emergency power generators a silent guardian?

However, the public has grown increasingly concerned over the stability of Taiwan's power system. Amid this transition, Taiwan's emergency power generators serve as silent guardians, playing an indispensable role that must not be misrepresented.

Can Taiwan's energy transition be achieved?

The ideals of Taiwan's energy transition can only be achieved if society fully and properly understands its role. Chen Bing-heng is a doctoral candidate in the College of Environmental Studies and Oceanography at National Dong Hwa University.

Which power plant has a coal-fired generator in Kaohsiung?

The emergency units — such as the Talin Power Plant and the No. 3 and No. 4 coal-fired generators at the Hsinta Power Plant, all in Kaohsiung — are characterized by their fast ignition, limited duration and environmentally friendly operation.
