How will Thailand's energy policy affect the energy sector?

As Thailand plans to add significant amount of renewables capacity in the next 13 years, the government would consider more flexible gas power contract. As a result, thermal power plants will likely see their operational hours cut further. This will lead to costlier coal and gas power. Source: BloombergNEF.

Who owns the power market in Thailand?

The Thai power market is moderately consolidated. Some major players active in the market (not in particular order) include Siemens Gamesa Renewable Energy SA, JinkoSolar Holding Co. Ltd, General Electric Company, BCPG PCL, and the Electricity Generation Authority of Thailand., among others. Image © Mordor Intelligence.

Does Thailand need more thermal power plants?

Thailand's heavy reliance on gas-fired power plants and increased reliance on liquefied natural gas imports have already resulted in higher power prices. Instead of adding more thermal power plants, Thailand needs to consider an orderly phase out of its thermal power plants in coordination with expansion of

clean power sources.

What is power generation in Thailand?

Electricity generation for utilities in the electricity industry is delivering (transmission, distribution, etc.) electricity to end users or storing it. Thailand Power Market is segmented by power generation, Power Transmission, and Distribution (T&D). By power generation, the market is segmented into conventional and renewables.
