

# The cost of electricity from solar panels

#### **Overview**

How much does a solar system cost per watt?

In 2023, NREL estimated that installing an 8-kilowatt (kW) residential solar system would cost \$2.68 per watt (W). According to EnergySage, the average cost per watt ranged from a low in Arizona of \$2.36 to a high of \$3.52 in Maine.

How much does a 5 kW solar system cost?

The average 5 kW system can generate around 7,500 kWh of electricity each year, saving you \$1,275 a year, depending on where you live. Since solar systems have a lifespan of 25 to 30 years, you'll save between \$31,875 and \$38,250 in utility bills over the life of the solar system. Let's say you install a 5 kW system for \$13,000.

How much does it cost to install solar panels?

While solar offers a great return on investment, it is a large ticket purchase that will require you to either have access to large sums of cash, or the ability to secure financing. \$30,000 depending on how many panels you require, while a heavy power consumer may spend upwards of \$50,000 for a larger installation.
