

# Türkiye wind and solar integration

### **Overview**

Does Türkiye have a strong wind energy capacity?

In 2024, Türkiye's wind energy capacity grew by only 6.5% (+770 MW), marking a significant slowdown compared to the peak annual additions of 1.7 GW in 2021.

Can Türkiye use untapped solar power to accelerate solar energy momentum?

Türkiye could utilize untapped capacities to advance solar energy momentum through floating, storage-integrated, hybrid and rooftop solar potential. The country has a pipeline of 33 GW in pre-licensed storage-integrated solar and wind projects, far exceeding the official 2030 target of 2.1 GW.

How has solar energy benefited Türkiye?

Over the past two and a half years, solar and wind energy combined have prevented \$15 billion in natural gas imports, reinforcing Türkiye's energy independence and reducing dependency on fossil fuels. Solar energy alone generated 52 TWh of electricity during this period, which accounted for 6% of the country's total electricity supply.

Does Türkiye have storage-integrated solar power?

In the area of storage-integrated solar power, Türkiye is making significant progress. As of 2024, 412 solar power plants with storage, representing a combined installed capacity of over 14 GW, have received pre-licenses. This figure far exceeds the 2.1 GW storage capacity target set in the NEP for 2030.

How much solar energy does Türkiye have?

Türkiye's solar energy capacity doubled from 9.7 GW in July 2022 to exceed 19 GW by the end of 2024. By August 2024, the country had already exceeded the 18 GW target set for 2025 in the National Energy Plan (NEP) by the Ministry of Energy and Natural Resources (MENR).

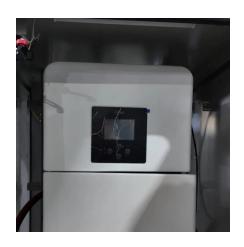

How has Türkiye doubled its solar capacity?

Türkiye has doubled its solar capacity in just 2.5 years, surpassing its current target more than a year ahead of schedule. The progress underlines the opportunity for an upgraded target in its upcoming Nationally Determined Contribution. Available in: Türkçe

### Türkiye wind and solar integration

# **EN Report: Türkiye surpasses 2025** solar target as capacity ...

The integration of storage systems, enhancements to the YEKA model, streamlined permitting processes, and the development of offshore wind projects collectively provide a pathway for ...

### Sustainable Farming & Renewable Energy in Türkiye

Explore Türkiye's unique agricultural landscape and renewable energy potential. Discover how integrating solar, wind, and biogas energy can enhance agricultural productivity and promote ...

# Solar PV and wind power driving Türkiye's renewable growth

Türkiye aims to quadruple its wind and solar capacity, targeting a goal of 120GW by 2035. To achieve this, it will install between 7.5 and 8GW of renewable energy capacity ...

### INTEGRATION OF SOLAR AND WIND ENERGY: A ...

Nowadays, some people prefer to employ RE sources like solar or wind energy in their homes

or on their property. The evaluation of the difficulties and advantages of combining solar and wind ...

### <u>Climate Analytics , Country briefing:</u> <u>Türkiye</u>

In this report, we explore the level of wind and solar that Türkiye would need to install as part of a global 1.5°C compatible pathway. Our benchmarks are also compatible with tripling ...

### Assessment and determination of 2030 onshore wind and solar ...

In this study, the wind and solar energy futures of Türkiye are analyzed in detail from a macro-economic perspective. Firstly, three different investment scenarios for Türkiye ...

### CIF Endorses \$70 Million Plan to Accelerate Turkey's Renewable ...

"Türkiye has the solar and wind resources to execute one of the most ambitious clean energy scale-ups in the world. Our support for the development of a smart, flexible, and ...

## Solar and wind power transition in Türkiye: An input-output

Abstract Türkiye ratified the Paris Agreement in 2021 and declared its intention to achieve the "net zero" target by 2053. The government announced a target of an increase of 1 gigawatt in solar ...

### Türkiye's energy journey toward an empowering future

The rapid growth in wind and solar energy was largely driven by the initial Renewable Energy Resources Support Mechanism (YEKDEM), which

### <u>Integrating Solar and Wind - Analysis</u>

A key aspect of this report is a first-ever global stocktake of VRE integration measures across 50 power systems, which account for nearly 90% of global solar PV and wind power generation. ...

# Türkiye in top 5 in Europe for renewable energy ...

Major advances in solar, wind energy Speaking at the opening ceremony of Smart Gunes Enerjisi Teknolojileri's new facility in the Aliaga ...

# Climate Investment Funds grant \$70 million to accelerate Türkiye...

With these improvements, Türkiye should be in a position to integrate an additional 60 gigawatts of wind and solar energy capacity into the power grid by 2035.

### Türkiye's shift to wind, solar energy stalls in 2023

A report by Climate Analytics and NewClimate Institute highlights the urgent need for Türkiye to boost its wind and solar energy capacity ...

# 3E analysis of a wind-solar-biomass energy generation in context ...

This research work presents a full 3E (Energy, Economic and Environmental) analysis for wind-solar-biomass energy generation system in the regional multi-MG structure in ...

# Türkiye surpasses 2025 solar target as capacity ...

This study examines the recent development of solar and wind energy capacities in Türkiye in the context of current renewable energy targets

### **Integration Issues Fact Sheet 2025**

Fact Sheets 2025 Wind and Solar Integration Issues Wind and solar power plants, like all new generation facilities, will need to be integrated into the electrical power system.

# 

### **CLEAN TECHNOLOGY FUND**

BACKGROUND The Climate Investment Funds (CIF) Renewable Energy Integration (REI) program is the world's only climate finance program fully dedicated to supporting the ...

## Developing Or Investing In Wind, Solar, And Energy Storage

As at end-April 2025, renewable energy sources constitute a major portion of Türkiye's total installed electricity generation capacity: hydroelectric power accounts for 27.2%, ...

### **Türkiye -- Clean Energy Platform**

To support this transition, Türkiye is scaling up investments in solar, wind, and hydropower, with strong government backing through feed-in tariffs, power purchase agreements, and incentives.

# Developing or Investing in Wind, Solar, and Energy Storage ...

Considering the dependency of the country on the import of oil and gas and its target to achieve a net-zero emission economy by 2053, Türkiye's strategic plan continues to be to develop the ...

### Türkiye can overcome grid limits using hybrid solar power

The integration of hybrid solar technology with traditional power sources has proven advantageous--adding approximately 14% to the output generated by hydroelectric ...

# <u>IEA - Integrating Solar and Wind - Power Library</u>

However, should countries fail to implement integration measures in line with a scenario where they achieve their climate and energy pledges, the global power sector could ...

# Türkiye's shift to wind, solar energy stalls in 2023

A report by Climate Analytics and NewClimate Institute highlights the urgent need for Türkiye to boost its wind and solar energy capacity significantly. To meet climate goals, ...

# Türkiye's new renewable map 'important step' in ...

Türkiye's new road map for renewable energy has received positive feedback in the sector, while nongovernmental organizations (NGOs) working in energy ...

## Türkiye surpasses 2025 solar target as capacity doubles in 2.5 ...

This study examines the recent development of solar and wind energy capacities in Türkiye in the context of current renewable energy targets and strategies.

# <u>Climate Analytics , Country briefing:</u> <u>Türkiye</u>

In this report, we explore the level of wind and solar that Türkiye would need to install as part of a global  $1.5^{\circ}$ C compatible pathway. Our ...
