

UK containerized power generation

Overview

Where can a containerised generator be used?

It can be used in various applications such as remote locations, disaster recovery, events, back-up power and construction sites where there is a need for reliable power supply. Each manufactured containerised generator is acoustically lined to achieve the external sound levels required at your site.

Why should you choose a containerised generator?

Fire Detection Panels and Intruder Alarms: Enhanced safety and security. Our containerised generators are suitable for a wide range of applications, including: Super Silent: Super silent 65dBA at 1m for prime power running diesel and gas. Critical Backup Power: For MOD, NHS, and HMP sites, ensuring reliable performance in emergencies.

What is a containerised modular power plant?

The containerised modular power plant is built to strict high-quality standards and accommodates ambient and heat temperatures, noise attenuation and adhere to site-specific requirements.

Why should you choose a containerised engine?

Our containerised solutions are designed to provide optimal performance across various site conditions, ensuring excellent reliability for all your power generation needs. By maintaining highquality standards for both the engine and the complete containerised package, we guarantee superior performance and longevity.

Why choose our flexible containerised gas engine?

Our flexible containerised gas engine is designed to accommodate restrictions in size and space for internal installation within an existing building. Furthermore, because our containerised CHP power plant is manufactured in-house, reduces installation time on-site and costs.

What are the benefits of a containerised power supply system?

This containerised approach offers benefits such as mobility, easy deployment, and scalability. It can be used in various applications such as remote locations, disaster recovery, events, back-up power and construction sites where there is a need for reliable power supply.

UK containerized power generation

Containerized Genset: The Smart Power Solution for Industrial ...

A containerized genset is a diesel or gas-powered generator that is housed within a specially designed ISO shipping container. This format offers a portable, weatherproof, and secure ...

Energy Solutions , Containerised hybrid power systems

Our containerised hybrid power system is an ideal solution for those needing deployable power, emergency power, back up power, power in remote ...

In the ever-competitive world of containerized power generation, ...

In the ever-competitive world of containerized power generation, after-sales support is a game-changer! Here's why: ? System Longevity: Regular maintenance and support ensure that your ...

Containerized, Plug& Play power plant in Sittingbourne, UK

Asoto delivered and commissioned three containerized power modules custom-built by the

client's specifications. The purpose of the modular power plant in Sittingbourne is to balance the local ...
