

Uninterrupted power supply to the Andorra base station computer room

Overview

What are the components of uninterruptible power supply (UPS)?

Components of Uninterruptible Power Supply (UPS). For Server room and datacenters only online configuration of UPS is recommended. A online UPS system consists of rectifier, inverter, battery bank, static bypass and manual bypass.

Do you need an uninterruptible power supply?

An uninterruptible power supply will provide years of reliable service if it is installed correctly and maintained. Whether your server room or datacentre has single or three phase UPS systems, similar planning is required to ensure that the UPS is installed correctly and powers all the loads it is expected to.

How do you Power an uninterruptible power supply?

Planning how to power the loads from the uninterruptible power supply is an important exercise. Smaller single-phase UPS use rear panel IEC type connectors to which PDUs, or a UPS maintenance bypass switch can be connected. If a UPS maintenance bypass switch is installed the PDU and load connection may be via a sub-distribution board.

How do I size a room for an uninterruptible power supply?

The most important factor in sizing a room for an Uninterruptible Power Supply is space around the equipment. You need to provide room for air to circulate and ventilation, as well as for manoeuvring around for generator maintenance and servicing.

Uninterrupted power supply to the Andorra base station computer
