

Uninterruptible power supply for base station room

Overview

The acronym UPS stands for Uninterruptible Power Supply. Essentially, if the power goes out, your devices shouldn't do. This allows you to shut down and save work or turn devices off safely. As such, UPS devices are rated for power (the amount they can).

At PCGuide we know power – yes we keep things switched off when not in use – and we know how underserved so many technology users are. So we've picked the best options for a range of use cases, drawing on our in-depth topic knowledge of both power.

An important factor to consider when buying an uninterruptible power supply is its software. Every uninterruptible power supply we've listed.

If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you. Its 1500VA/900W capacity should be more than.
