How can solar energy improve electricity access in Vietnam?

**Off-grid and Rural Electrification:** Solar energy can play a pivotal role in providing electricity to off-grid and remote areas in Vietnam. Promoting decentralized solar systems, microgrids, and energy storage solutions can improve energy access and bridge the electrification gap.

What are the advantages of floating solar power in Vietnam?

**Floating Solar Power:** Vietnam has a vast network of reservoirs and water bodies, presenting opportunities for the development of floating solar power projects. Floating solar offers several advantages, including land conservation, reduced evaporation, and improved panel efficiency due to natural cooling from water bodies.

Will Vietnam introduce a new net metering scheme for rooftop PV installations?

In a Significant move, In September 2024, Vietnam plans to introduce a new net-metering scheme for rooftop PV installations, as reported by the state-run news outlet Bao Chinh Phu. The government has raised the threshold for excess PV electricity sold to the grid, increasing it from the previous 10% to a new limit of 20%.

How has the FIT program impacted solar power development in Vietnam?

The FiT program has been a major driver of solar power development in Vietnam, offering a tariff of 9.35 cents per kilowatt-hour (kWh) for projects completed by June 2019. This program led to a surge in solar capacity, reaching 4.46 gigawatts of new installations.
