

# **What are the portable commercial power supplies**

## Overview

---

A commercial portable power station is a high-capacity energy storage system designed to power various electrical devices, tools, and equipment at outdoor and remote worksites. What is a portable power supply?

A portable power supply is a device that can store and provide electrical energy for various purposes. It can power small appliances, charge electronic devices, or supply emergency backup power in case of a blackout. Portable power supplies are usually rechargeable and have different capacities and features depending on the intended use.

What are commercial and industrial power supplies?

Commercial and industrial power supplies are designed and manufactured by us—DC power supplies plus redundant power systems for mass-storage markets and PC servers. Avionics, industrial control, telecommunication and video industries are also served with power supplies.

What is a Porta-safe® temporary power center?

Porta-Safe® temporary power centers are portable electrical distribution centers that step-down plant site power from 600/480 VAC to usable 240/208/120 VAC providing power for welding, power tools and lighting with GFI protected 120/240V receptacles for all of your outage and turnaround power needs.

What is a Porta-safe® distribution load center?

Porta-Safe® distribution load centers can be skid mounted, stationary or provided in two and four wheeled cart designs, depending on jobsite temporary power demands or your specific requirement. JNT Technical Services, Inc. markets specialized performance and maintenance equipment for the power generation and other energy related industries.

What is a Porta-safe® power distribution unit (PDU)?

Porta-Safe® will take your specifications and develop a robust and rugged custom designed power distribution unit (PDU) to fit your specific needs and requirements for temporary and portable jobsite power.
