

# When will Haidao Communications deploy 5G base stations

## Overview

---

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How many 5G base stations are there in India?

Citing that the country has built a staggering 4.19 million 5G base stations, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

How many customers have signed up for 5G in China?

Despite concerns about the commercial viability of 5G, China Mobile has recently reported that an impressive 689 million customers have signed up for its 5G package. This remarkable figure reflects China's unique journey towards 5G rollout and commercialization. Join us as we explore the exciting

developments in China's 5G market. By Tianhe Xie.

Does China support 5G?

As these companies are state-owned in nature, their culture and organisational setup make them responsive to political objectives. Consequently, the steadfast policy support for 5G in China becomes a critical factor to promote 5G rollout. Since 2013, China has viewed 5G as a core part of its science and technology policy.
