

# **Who is the company that provides the green base station for East Timor Communications**

## Overview

---

What is a green base station?

The Green Base Station which is introduced is equipped with the regenerative energy sources wind power and photo-voltaic energy to reduce the power consumption taken out of the public grid to a minimum, whenever sunlight or wind is present.

Does Timor-Leste have a high speed service?

The new high speed service is available in all 13 of Timor-Leste's districts, providing territorial coverage of 70%. Timor Telecom was the market leader for a long time, but lost to Telemor recently.

How does a green base station reduce the use of lead acid batteries?

Only a small backup battery is used during the start-up time of the fuel cell. Thus, the amount of lead is reduced to a minimum in the Green Base Station. Depending on the system configuration, it is even possible to completely avoid the usage of lead acid batteries.

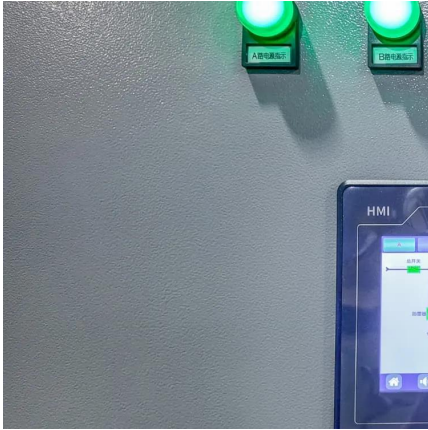

Does Timor-Leste have 4G & 3G?

It started as late as 2013 and has built up a good coverage ever since. 2G and 3G is on 900 and 1800 MHz covering more than 95%. In 2017 they have started 4G/LTE on 1800 MHz. The new high speed service is available in all 13 of Timor-Leste's districts, providing territorial coverage of 70%.
